PERFORMANCE LIGHTING TECHNOLOGY

Diode Dynamics Has The Best Automotive LED Lights

When it comes to automotive lighting, halogen lights have had their time in the yellowish limelight. Now, as automotive electronics are evolving, lighting is no exception. Diode Dynamics has been creating Automotive LED lighting products since 2006 and we have quickly grown to become one of the top manufacturers of Automotive LED Lights in the country. If you are looking to add LEDs to your vehicle, you can find everything you need on our site.

LED lights offer several advantages over conventional halogen lights. Instead of relying on a glowing filament enclosed in halogen gas, a technology that is over 125 years old, LED lights produce their light using a specialized type of semiconductor. Basically, as electrons move across the LED, they have to squeeze into electron holes. During this process, the electrons shed energy in the form of light. Unlike halogen bulbs, which also produce large amounts of heat as a bi-product, LEDs convert almost all of their energy into light.

Diode Dynamics Has The Best Automotive LED Lights

Our most popular automotive LED lights are our SL1 LED headlight bulbs. These bulbs are designed to precisely mimic the positioning of your OEM halogen bulb's filament. By matching the position and reducing the spacing between the back to back LED chips in each bulb, the light emitted by our bulbs is able to interact with the reflectors inside your headlights to offer an incredibly well-focused output compared to other LED bulbs on the market.

We also offer offroad LED light bars that offer a huge spread of light to illuminate the path ahead while driving off-road. Our Stage Series light bars feature our specially engineered total internal reflection (TIR) optics to offer more output in our 6" light bar than you would typically get from a 30" bar from eBay. We also offer compact 3" LED light pods that can be mounted virtually anywhere on your vehicle.

Diode Dynamics Has The Best Automotive LED Lights

Finally, we offer several LED modules and accents. Whether you want to turn some heads with our colorful LED demon eyes, upgrade your tail lights, or add some internal LED strip lights, we have the parts you need to upgrade your vehicle and give it the unique and modern look you are going for.

So if your lights are in need of an upgrade, visit our site today. When it comes to automotive LED lights, all of our products are designed to last. Our products all come with worry-free warranties and are designed to last for tens of thousands of hours versus the 1000 hour lifespan of an average halogen bulb. If you have any questions about our products, you can reach a member of the Diode Dynamics team at 314-205-3033 or contact@diodedynamics.com.

Diode Dynamics Has The Best Automotive LED Lights

So if you're ready to upgrade your sidemarker lighting, visit our website today. You can buy sidemaker LED lighting directly through our site or purchase them and have them installed from an authorized retailer. All of our sidemarker LEDs come with a 3 year worry-free warranty so you can add these lights to your vehicle with the added security that we will replace them if they malfunction within that period. If you have any questions about our sidemarker LEDs or any of our other quality automotive LED products, you can reach a member of our team at 314-205-3033 or contact@diodedynamics.com.
