

12 Indian Drones Neutralized in Multiple Cities Since Last Night, DG ISPR Confirms

In a tense escalation, **12 Indian drones** have been **neutralized** by Pakistan's military forces across several cities since **last night**, as confirmed by **DG ISPR**. The drones, which were reportedly attempting to breach Pakistani airspace, were intercepted and destroyed before they could carry out any significant operations.

The interception of the drones has raised alarms over the growing use of unmanned aerial vehicles (UAVs) in cross-border operations, adding another layer of complexity to the already fraught India-Pakistan relations. This latest development comes amid heightened tensions and increasing military activity in the region.

DG ISPR's confirmation has sparked a flurry of reactions across both national and international media, with analysts pointing to the potential consequences for regional security. The use of drones in such a manner signals a new phase in military confrontations, where technology plays an ever-increasing role.
